58 Years of Good Luck with Maule's Seeds!

—another “good luck” greeting
from the old reliable seed house

THESE are the days we wish we could get in the old bus and start out to visit our millions of friends all over the country, and hear from your own lips in your own home all about your crops last summer. But we can't be in millions of places at once—so tonight when the chores are done and you turn the pages of this book, just imagine you had been visiting us last summer and had seen for yourself in the fields what we're telling you now about your favorite varieties.

We want to urge you to try a wider variety of vegetables this year—at least for your own table use. There are so many really delicious things, both old and new! We've been pleased to see so many Maule customers doing this the past few years.

And flowers, too! Isn't it a pleasure to drive along and see so many flower gardens? Don't they cheer everybody? That's why we have selected seeds of beautiful flowers for our good-luck gifts to you this year. Cut flowers sell well, too, on roadside stands along with the vegetables.

We hope you had good crops last year, in spite of the drought. If you were hit hard, we know your “grit” will carry you through—and we want to help. That's why you can “buy from Maule—pay next fall”.

When we say good luck we really back it up—for we send you only the highest quality seeds, tested and guaranteed, **at low prices**. That's why generation after generation have continued to plant Maule's seeds in the past 58 years—why over a million folks are now reading Maule's Seed Book. So—to both old and new friends—“Good Luck with Maule's Seeds!”

MAULE'S EASY PAYMENT PLAN

Would it help you to buy your seeds on time?

WE are glad to give Maule customers the privilege of getting all their seeds at once, but letting part of the payment go till they have received the first money from their crops, anytime before September 1st. Last year thousands took advantage of this plan, and we treasure the many letters they have written to tell how much it helped.

Of course we know all Maule customers like to pay cash when they can—but we wanted to do something to help when cash has been so scarce on so many farms.

Pick out all the seeds you want, both vegetable and flower—write them down on the blue Easy Payment Order Blank and send us just half of the total cost with your order. Then pay the balance anytime before September 1st. Now you can get twice as many seeds as you thought you could afford to plant.

We're not even charging interest, for Maule customers pay promptly. All we ask is that you make your order for over \$4.00, and order early. **Use the Blue Order Blank to Get Your Seeds Now on Maule's Easy Payment Plan.**

1877-1935

Here is the token so familiar to Maule customers for many years—the symbol of quality.

Maule's Famous 4-Leaf Clover Guarantee:

We guarantee—

All goods shipped by us to reach you in good condition.

To refill your order or refund—anytime within the year—the full amount paid us for Seeds, Bulbs or Roots, if you are not satisfied with the results.

We send you only the highest quality seeds and gladly stand back of them. But weather, soil and care also influence crops, so in no case shall we be responsible for any amount beyond the sum you actually pay us for the Seeds, Bulbs or Roots.

Low Prices!

Good news! In spite of the drought in many sections, we have been so fortunate that we are able to keep most Maule prices just as low as last year (the lowest in many years), with the exception of only a few kinds where there was almost a crop failure!

Our Gift To You! NEW

Maule's Famous Lawn Grass Mixtures

891 Maule's "Extra Quality" Lawn Grass Mixture

Unsurpassed for a velvety green, deep sod that will be permanent and showy throughout the spring, summer, and fall. Contains only the finest grasses suited for making a beautiful lawn.

No matter how beautiful your borders or shrubs, the general appearance of your home grounds depends primarily upon the condition of your lawn. We know that this special mixture, which has been carefully compounded, will give the kind of lawn which every home owner is proud to have. It contains the very finest grasses for lawn making and is free from common grasses which make tough blades or are inclined to form unsightly clumps. It also contains a small quantity of white clover which is desirable to have in the lawn because it helps thicken the sod and grows well together with the lawn grasses we have included. The experience of thousands of our customers is definite proof that Maule's "Extra Quality" Lawn Grass seed is as good a mixture as can be had anywhere at any price.

1/2 lb. 35c; 1b. 60c; 2 lbs. \$1.10; 5 lbs. \$2.50; 10 lbs. \$4.50, postpaid.

Not prepaid: 15 lbs. \$5.50; 25 lbs. \$9.00; 50 lbs. \$17.75; 100 lbs. \$35.00; 250 lbs. \$82.50; 500 lbs. \$150.00.

884 Quick Results Lawn Grass Mixture

A Rapid Growing, Velvety Grass

We recommend this mixture to all gardeners who want a beautiful effect in the shortest time possible. Besides the grasses which are suited for this purpose, we have included enough seed of others to insure permanent results to last as long as you take care of the lawn. You may expect to cut your lawn for the first time about 2 weeks earlier from this than from any other grass seed mixture. It is particularly adapted for late spring and summer sowing. 1/2 lb. 30c; 1b. 55c; 2 lbs. \$1.00; 5 lbs. \$2.25; 10 lbs. \$4.00, postpaid. Not prepaid: 15 lbs. \$1.80; 25 lbs. \$7.75; 50 lbs. \$15.25; 100 lbs. \$30.00; 250 lbs. \$70.00; 500 lbs. \$125.00.

886 Maule's "Steep Slope" Lawn Grass Mixture

Especially Adapted for Embankments and Terraces

In order to establish a good sod on slopes, embankments, and terraces it is most essential that the grasses sown are deep rooting in order to hold the soil in place. This mixture has been compounded with this point in view. It contains only typical lawn grasses which have long, spreading root growth and will withstand considerable heat and dry weather. To prevent washing after the seed is sown, cover the bank with burlap or cloth until the young seedlings have taken hold of the soil. 1/2 lb. 35c; 1b. 65c; 2 lbs. \$1.20; 5 lbs. \$2.75; 10 lbs. \$5.00, postpaid. Not prepaid: 15 lbs. \$6.00; 25 lbs. \$9.75; 50 lbs. \$19.25; 100 lbs. \$38.00; 250 lbs. \$90.00; 500 lbs. \$165.00.

885 Maule's "Shady Lawn" Grass Mixture

Flourishes under Trees or in Shady Nooks

Nothing spoils the good effect of an otherwise fine green lawn than bare spots in shaded corners or under trees. Using this grass mixture will help you considerably to do away with these unsightly sections as the grasses we have included in this mixture are naturally adapted for growing in semi-shaded positions. Proper preparation of the soil, an ample supply of plant food, and regular watering may be needed if natural rains do not reach the shaded spots in abundance.

1/2 lb. 40c; 1b. 70c; 2 lbs. \$1.30; 5 lbs. \$3.00; 10 lbs. \$5.50, postpaid. Not prepaid: 15 lbs. \$7.00; 25 lbs. \$11.50; 50 lbs. \$22.75; 100 lbs. \$45.00; 250 lbs. \$107.50; 500 lbs. \$200.00.

887 Maule's "Sunny South" Grass Mixture

Especially Suited to Hot Climates

This mixture is adapted to our southern states where the ordinary lawn grass mixtures will not succeed sufficiently well to provide an even, smooth, rich green lawn. It is suited for growing in the South only, as it contains southern grasses that will give a good sod even during the hot summer weather provided the lawn is watered liberally. 1/2 lb. 30c; 1b. 50c; 2 lbs. 90c; 5 lbs. \$2.00; 10 lbs. \$4.50, postpaid. Not prepaid: 15 lbs. \$4.00; 25 lbs. \$6.50; 50 lbs. \$12.75; 100 lbs. \$25.00; 250 lbs. \$57.50; 500 lbs. \$100.00.

797 White Dutch Clover

Gardeners who prefer an extra-heavy growth of clover in their lawn should add this at the rate of 4 ounces to every 2 pounds of grass seed. Sow separately in order to effect an even distribution as clover seed is much heavier than grass seed. Postpaid: Pkt. 15c; 1/4 lb. 25c; 1b. 60c; 2 lbs. \$1.10; 5 lbs. \$2.60; 10 lbs. \$5.00. Not prepaid: 100 lbs. \$10.00.

Asparagus

Culture:—Sow the seed early in the spring in drills an inch apart in the row and 2 to 3 ft. apart between the rows. Firmly cover the seed with one inch of fine soil. As soon as the young plants appear, begin shallow cultivation and keep free from weeds at all times. A packet will produce about 200 plants; one ounce about 750 plants; 4 to 5 lbs. of seed is needed per acre.

Asparagus roots should be planted in rows not less than 2½ ft. apart, therefore requiring 100 roots for a patch 20 by 20 feet; 5,000 to 7,000 roots are needed to plant one acre.

4 Mary Washington Rust-Resistant

The Newest Creation in Asparagus

A most remarkable Asparagus that has replaced all other varieties because it is practically free from rust and other diseases, yet it makes larger, thicker, and more uniform shoots of a beautiful rich green color with a heavy shading of rich purple at the tips. The tips or buds are pointed and tightly folded and do not branch out until well beyond market height. Makes a clean, sturdy growth and produces the finest kind of green asparagus for both home use or market. Our strain of this foremost asparagus is unexcelled in every way. Pkt. 10c; oz. 15c; ¼ lb. 30c; ½ lb. 50c; 1 lb. 80c; 2 lbs. \$1.45; 5 lbs. \$3.40; 10 lbs. \$6.00.

105 Calabrese Broccoli

Brussels Sprouts

108 Danish Prize

Compact, Miniature Cabbages Closely Set Along the Stem

(125 days) Brussels Sprouts is a delicious vegetable belonging to the cabbage family but it excels cabbage in mildness and sweetness. It should be more largely grown in the home gardens as it supplies the table with fresh green sprouts in the late fall and winter. The plants are medium-tall, producing an abundance of large yet solid dark green, tightly folded sprouts of choicest quality. Grow it in moderately rich soil to avoid an excess of leaves. Sow the seed in April or May in the open ground. Transplant in rows 3 ft. apart and 18 in. in the row. Break off the leaves along the stem to aid the formation of the small heads. A packet gives about 300 plants and an ounce is sufficient for 3,000 plants. Brussels Sprouts is grown mostly for winter use, and as the plants are quite hardy they are allowed to remain in the garden until after frost. In fact, the flavor of the young sprouts is greatly improved after they have been frosted. Pkt. 10c; oz. 20c; ¼ lb. 65c; ½ lb. \$1.00; 1 lb. \$1.75; 2 lbs. \$3.20; 5 lbs. \$7.70.

One packet produces 250 plants; 3,000 plants to the ounce. Pkt. 15c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.15; ½ lb. \$2.05; 1 lb. \$3.75; 2 lbs. \$6.95; 5 lbs. \$16.85.

Wax or Yellow-Podded Bush Beans

Culture: The culture of wax-podded bush beans is the same as for the green-podded varieties. There are many markets where wax beans are great favorites and our list of varieties includes flat-podded as well as round-podded kinds. As a general rule, the flavor of wax beans is somewhat milder than that of the green-podded varieties. Their rich, light yellow color also has a special appeal usually associated with the idea of tenderness and flavor. One packet will sow 25 feet of row. One lb. for 100 ft.; 60 lbs. per acre.

Culture: Sow the seed thinly in drills 18 in. apart and carefully thin the plants to stand 3 to 4 in. in the row. The round and turnip-shaped varieties are grown mostly for spring and summer use, though they are also excellent for fall and winter storing. The half-long kinds require a longer growing season and are known as good winter keepers. For a continuous supply of fresh roots, sow repeatedly from spring until midsummer. A packet of seed is enough for 25 ft. of row; one ounce for 100 ft.; 5 to 6 lbs. per acre.

66 Maule's Blood Turnip Beet

The Most Uniform, Deepest Red Beet in Existence. Tender, Productive, and Exceedingly Sweet

(50 days) This Beet is miles ahead of any other variety ever offered anywhere. That is a strong claim, but thousands of market growers and home gardeners will substantiate this claim, and consider our enthusiasm mild in comparison to the outstanding features of this Beet. It is an early variety with a rich, dark red skin. The uniformity in size and shape is truly remarkable. They are perfectly globe shaped and always smooth. The flesh is deep red with hardly any zone. It retains the deep red color when cooked. The flesh is fine grained, tender, and most agreeably sweet. *It may be grown for early spring use, for summer, fall, or winter storing, or for canning.* Pkt. 10c; oz. 20c; ¼ lb. 50c; ½ lb. 75c; lb. \$1.25; 2 lbs. \$2.30; 5 lbs. \$5.50; 10 lbs. \$10.00.

81 Maule's Dark Red Egyptian

Early Maturing; Heavy Yields;
Firm Sweet Dark Red Flesh

(40 days) No other Beet can replace this well established variety for earliness. Under favorable conditions the roots grow quickly and reach full size in an astonishingly short time. A favorite with market growers who plant it extensively for forcing to supply the early market. As the roots are of medium size and have only a limited amount of foliage, they can stand quite close planting which, in turn, means increased yields from the land available. The compactness of the plant is only one of the features that has made it valuable for growing under glass. Its quality, attractiveness, uniformity, and the dark red color of the flesh are characteristics that will appeal to many gardeners. Cooks sweet, tender, and crisp, retaining its bright red color nicely and is very desirable for pickling. Pkt. 10c; oz. 15c; ¼ lb. 40c; ½ lb. 60c; lb. \$1.00; 2 lbs. \$1.85; 5 lbs. \$4.40; 10 lbs. \$8.00.

84 Detroit Dark Red

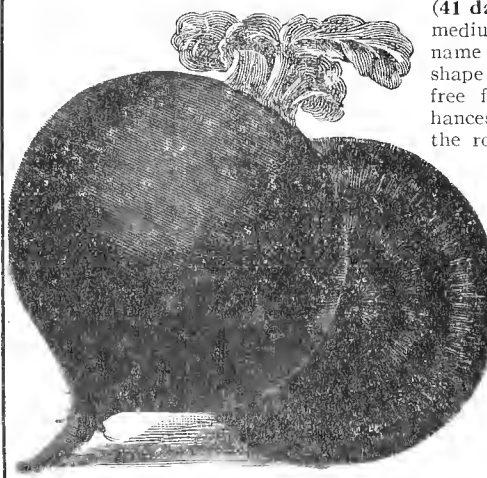

A Highly Bred, Globe Shaped
Beet for Home or Market

(50 days) We offer a special strain of this famous home garden and market grower's Beet. It excels in uniformity of size, shape, and color, being suited for home use, market sales, storing, shipping, and canning. The roots are of medium size, smooth, perfectly globe shaped, and of generally good appearance. The color of the flesh is a most intense deep red, showing no signs of any zones after cooking. It remains tender throughout and free from fiber until fully grown. A steady demand from the same people year after year is proof that this is the Beet to grow. Our seed will produce uniform fruits that excel in color and firmness as well as in quality. The tops are small, which not only permits close planting but makes it ideal for bunching. Pkt. 10c; oz. 15c; ¼ lb. 45c; ½ lb. 70c; lb. \$1.15; 2 lbs. \$2.10; 5 lbs. \$5.05; 10 lbs. \$9.20.

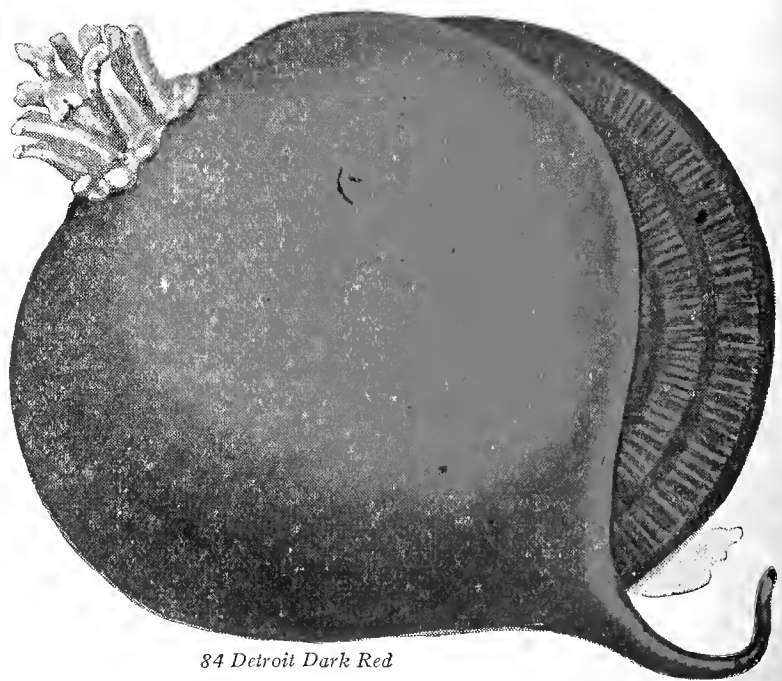

78 Crimson Globe

Medium Size, Globe Shaped, Small Foliage

(41 days) A handsome Beet of medium size which received its name from the uniform globe shape of the roots. It is entirely free from rootlets which enhances the good appearance of the roots. For a second early variety it is hard to beat. The foliage is small which makes it suitable for forcing under glass. The flesh is rich blood-red with somewhat lighter zones. Always at its best either when young or old. Pkt. 5c; oz. 15c; ¼ lb. 40c; ½ lb. 60c; lb. \$1.00; 2 lbs. \$1.85; 5 lbs. \$4.40; 10 lbs. \$8.00.

77 Crosby's Egyptian

Medium Size Tops, Roots Flattened Globe Shape. Flesh Deep Red, Zoned Lighter

(42 days) Our strain of this quality Beet is a decided improvement on the older forms of Egyptian and we claim there is no better early garden Beet. The roots are larger and more globular though still somewhat flattened at the top, representing more or less of a turnip shape. The skin is a very deep red and the flesh is somewhat lighter in color. The foliage is quite short so that by close planting the yield from a given area can be considerably increased. Market gardeners will find this an ideal variety for bunching. Pkt. 10c; oz. 15c; 1/4 lb. 40c; 1/2 lb. 60c; 1 lb. \$1.00; 2 lbs. \$1.85; 5 lbs. \$4.40; 10 lbs. \$8.00.

68 Good for All

(50 days) This Beet is well named, as it is equally good for table, bunching, pickling or canning. A special selection from Detroit and may be used at all stages of its growth. Can be harvested when 1 1/4 in. in diameter for canning, but even if left until full grown, they will hold their color, shape and quality. Roots are very smooth and uniform in size; the flesh is deep blood-red with practically no zones, and is fine grained, sweet and crisp. Tops are medium size and quite spreading. Equally desirable for market or home garden. Pkt. 10c; oz. 20c; 1/4 lb. 50c; 1/2 lb. 75c; 1 lb. \$1.25; 2 lbs. \$2.30; 5 lbs. \$5.50; 10 lbs. \$10.00.

67
Maule's Alpha

67 Maule's Alpha

Dark Crimson Color, Uniform Size and Splendid Quality. Fine for Home Garden and for Canning (40 days) We regard this as an exceptionally fine Beet with large roots of even size and splendid quality. Its shape is that of a turnip; just a little deeper than Crosby's Egyptian. The flesh is dark crimson with slightly lighter zones or rings. As the top growth is small it stands close planting very well. Its attractiveness and earliness have made it a great favorite with many. It is undoubtedly one of the best Market Beets. When cooked it has a rich sweet flavor and it is entirely free from any fiber or toughness. Equally fine for immediate use or for canning. Pkt. 10c; oz. 20c; 1/4 lb. 50c; 1/2 lb. 75c; 1 lb. \$1.25; 2 lbs. \$2.30; 5 lbs. \$5.50; 10 lbs. \$10.00.

72 Ohio Canner

Blood-Red Flesh with Few Zones. Retains its Color After Canning

(60 days) While this variety has been improved principally for the purpose of canning, it nevertheless represents a most valuable variety for home gardeners and market growers who cater to a select market. The shape of the Beets is round or slightly flattened. The foliage is reddish green and somewhat smaller than that of Detroit Dark Red. The very dark red skin is exceptionally smooth. The color of the flesh is the darkest of any of this type showing hardly any zones at all. This is a Beet that will remain tender and sweet all summer and well into the late fall. Whether young or old, small or large, they are always tender and sweet. Pkt. 10c; oz. 20c; 1/4 lb. 50c; 1/2 lb. 75c; 1 lb. \$1.25; 2 lbs. \$2.30; 5 lbs. \$5.50; 10 lbs. \$10.00.

73 Winter Keeper

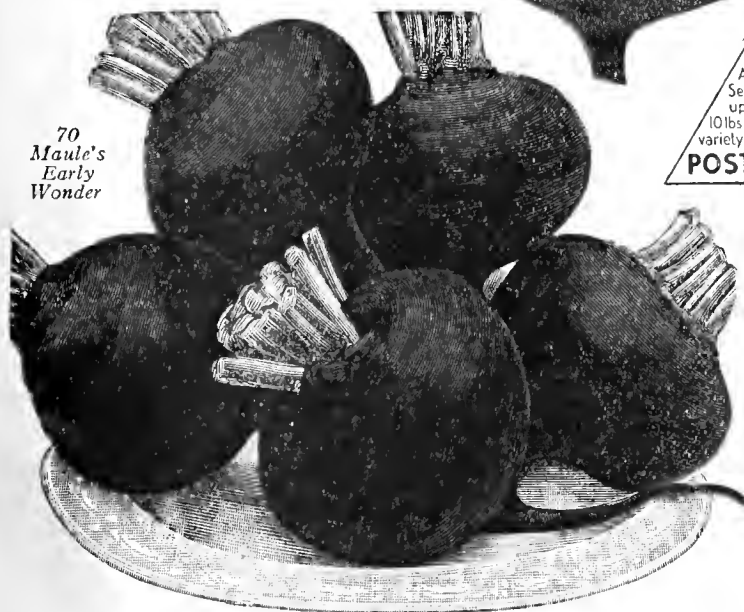

Tender and Delicious the Entire Summer

(60 days) This is truly a "Long Season" Beet and just the one you want as it will remain tender and sweet all summer, and will also keep well into the winter. Unfortunately it is not as perfect in shape as some we have seen, and so is not especially recommended for Market Gardeners, but for Home Gardens where quality is all that counts this is an invaluable new variety. This top-shaped Beet is of medium size, and of rich red color with few zones. Grows slowly and is seldom ready for early use, but even when old the Winter Keeper will be found as tender as other Early varieties. Pkt. 10c; oz. 20c; 1/4 lb. 50c; 1/2 lb. 75c; 1 lb. \$1.25; 2 lbs. \$2.30; 5 lbs. \$5.50; 10 lbs. \$10.00.

70 Maule's Early Wonder

Also Known as Boston Crosby. Early, Tender and Sweet; Dark Red Roots

(40 days) This early Beet is the result of yearly selection made over a long period of time. As we offer it today it seems almost impossible to still further improve its appearance and excellent quality. The roots are of turnip shape, of a beautiful deep red color, and of medium size. This characteristic makes it possible to grow them quite close and thereby increase the yield from a given area. Equally desirable for home garden planting as for market. Pkt. 10c; oz. 15c; 1/4 lb. 40c; 1/2 lb. 60c; 1 lb. \$1.00; 2 lbs. \$1.85; 5 lbs. \$4.40; 10 lbs. \$8.00.

Culture: Plant the seed after all danger of frost is over and the ground has warmed up. Sow in rows 3 to 4 ft. apart. Cover the seeds about one inch deep. Space the seed 8 in. apart in the rows. The most popular method, however, for field planting is to drop 3 to 4 seeds in hills spaced either 3 by 4 ft. or 4 by 4 ft. Allow 2 to 3 plants to remain in each hill. In order to provide a continuous supply of good fresh corn, make succession plantings until about July 10. The final date of planting, of course, depends entirely upon your climatic condition. A packet of seed will plant four rows, each 25 ft. long; $\frac{1}{2}$ lb. for 200 hills; $12\frac{1}{2}$ lbs. per acre.

We Claim That This Is The Finest Large Eared Sugar Corn In Existence

(70 days) When a variety of Sweet Corn not only holds its own for a period of over 22 years but its sales increase with every season, it simply must be good. While its days to mature have been given above as 70, we know of many instances where it has produced its first ears within 58 to 62 days after planting. Quality in Sweet Corn is, however, more important for its popularity than season of maturity. The ears are 7 to 9 in. long and frequently 2 to 3 in. thick with 12 or 14 rows of large sweet kernels that fairly melt in your mouth. The plants are 6 to 7 ft. tall, many of them carrying 2 to 3 ears on a stalk. Pkt. 15c; 1/2 lb. 30c; 1 lb. 50c; 2 lbs. 90c; 5 lbs. \$1.80; 10 lbs. \$3.35, postpaid. (110 days) A new type developed from the famous Golden Self Blanching Celery and already very popular with celery growers. The plants are semi-dwarf and have thicker stalks than those of the original Golden Self Blanching. The heart is particularly thick and full and the stalks are wider and more substantial. When blanched the stalks are a beautiful light golden yellow which suggests their choice quality. The flavor is distinctly nutty and rich. Pkt. 10c; ½ oz. 35c; oz. 55c; ¼ lb. \$1.65; ½ lb. \$3.00; 1 lb. \$5.50; 2 lbs. \$10.25; 5 lbs. \$24.75; 10 lbs. \$46.75.

Fruits are Thick, Mild, and of Excellent Quality. Very Early For So Large a Variety

Beautiful Hardy Lilies and Other Bulbs

Lilies are easy to grow in any average garden soil. They require good drainage and will live for many years as they are hardy and permanent. The varieties which we list are particularly showy and vigorous. It is important, however, that you follow the suggestions given as to the depth of planting to insure a fine display of flowers for many years to come. We offer sound, well graded bulbs of large blooming size, though some of the varieties have smaller bulbs than others. All are guaranteed to give satisfaction.

72B26 Golden Banded Lily of Japan

(*Auratum platyphyllum*) This is a great favorite of all gardeners. It is a wonderful variety, first found on sacred Mt. Fuji in Japan. It has large white flowers attractively splashed with bright crimson. The beauty of the flowers is enhanced by a broad golden band running through the midrib of each flower petal. It blooms from July until September and will grow from 3 to 6 ft. tall. Cover the bulb with 12 in. of fine soil. Does well in sun or in semi-shade. Needs perfect drainage and cannot stand manure or lime. Place the bulb upon a handful of sand and mix a little leaf mold with the soil used in covering the bulb. Delightfully fragrant. 40c each; 3 for \$1.10; 6 for \$2.00.

72B25 Leopard Lily

(*Pardalinum*) This Lily has small bulbs produced in clusters and creeping under ground. Cover the bulbs about 5 in. deep and be sure they are planted above the water line. The plants grow 3 to 7 ft. tall and bloom during June and July. They have bright yellow petals attractively spotted with purple and tipped with orange-scarlet. It requires a sunny position and cannot endure lime. Plant it in rich, heavy loam soil to which has been added leaf mold or peat moss. A western variety. 30c each; 3 for 80c; 6 for \$1.50.

72B35 Yellow Japanese Lily

(*Hansonii*) This is also called Japanese Turk's Cap Lily. It was brought to us from Korea. The plants grow 3 to 5 ft. tall and bloom during June. The Yellow Japanese Lily is, therefore, one of the earliest to flower. Cover the bulb 8 to 10 in. deep with moderately heavy garden loam. It seems to be indifferent toward lime. The flowers are bright orange attractively spotted with brown. This splendid Lily looks exceedingly well planted in the foreground of Rhododendrons or amid Azaleas where it receives a little shade and is protected against wind and storms. 40c each; 3 for \$1.10; 6 for \$2.00.

Gloxinia

71B24 Mixed Colors Large bell-shaped flowers in many fine colors. Plant the bulbs in rich soil. Provide proper drainage and keep evenly moist. A splendid pot-plant. 30c each; 3 for 80c; 12 for \$3.00.

Hyacinthus

71B60 Candicans Stately flower spikes, 3 to 4 ft. tall, bearing from 20 to 30 large creamy-white bell-shaped blooms. The plants produce flowers all during the summer. 20c each; 3 for 50c; 12 for \$1.75.

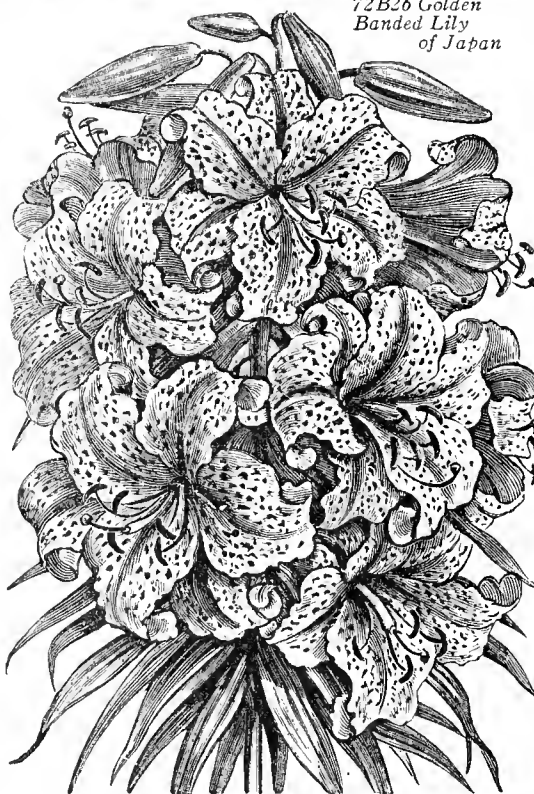

Ismene—Peruvian Daffodil

72B06 Calathina Showy white Amaryllis-like blooms produced freely during the summer. They are fragrant and of artistic appearance. The bulbs should be planted in the spring after all danger of frost is past. 25c each; 3 for 70c; 12 for \$2.50.

72B32 Regal Lily

72B26 Golden Banded Lily of Japan

72B27 Coral Lily

(*Tenuifolium*) A graceful variety often planted in the rock garden. Grows 18 in. tall and flowers during June. Has bright orange-scarlet blooms spotted with mahogany-red. Cover the bulbs with 7 in. of fine loamy soil. Plant in partial shade or in the woodland garden. Can be grown in any light soil. It looks particularly lovely planted with ferns. 30c each; 3 for 80c; 6 for \$1.50.

72B33 Crimson Show Lily

(*Speciosum Melpomene*) A magnificent, large flowered Lily with rich carmine-crimson flowers spotted with mahogany-red, and edged with white. Grows 2 to 3 ft. tall and does well in either partial shade or full sunshine. Cover the bulb 10 in. deep with sandy soil. Easy to grow, flowering profusely during August and September. This is a native of Korea. Also forced for winter blooming. 40c each; 3 for \$1.10; 6 for \$2.00.

72B28 Double Tiger Lily

(*Tigrinum flore pleno*) This is a showy double flowering Lily with large blooms of a rich bright orange color with purplish black spots. The plants grow 3 to 4 ft. tall and give a splendid display during August and September. Cover the bulbs 8 to 10 in. deep with moderately rich soil. They do well in full sunshine but will also stand a little shade. 20c each; 3 for 55c; 6 for \$1.00.

72B40 Giant Tiger Lily

(*Tigrinum f. rtunei giganteum*) Few other Lilies are as well known and as widely grown as this stately variety. The plants grow 4 ft. tall and make a fine display during August and September. Cover the bulbs with 8 to 10 in. of rich soil and plant them in a sunny position with some low growing plants covering the ground around them. They are rich orange and have purple spots. Exceedingly easy to grow and very hardy. 20c each; 3 for 55c; 6 for \$1.00.

72B32 Regal Lily

(*Regale*) A new Lily brought to us from the mountains of Tibet in China. The large, wide open blooms are pure white inside and have a yellow throat. The outside is marked with rose. Grows 3 to 5 ft. tall and flowers during June and July. Cover the bulbs 10 in. deep with sandy soil mixed with a small quantity of coal ashes. 30c each; 3 for 85c; 6 for \$1.50.

Maule's Beautiful Asters

Asters, or China Asters as they are often called, are easy to grow in any good, deeply spaded soil such as would grow vegetables. They give a wonderful display of large showy blooms and are ideal for beds, borders, and cutting. We offer on this and the following pages quite a few different types from which to choose, as regards shape of the flower, habit of growth, or blooming season. For earliest blooms we recommend Maule's Earliest Blooming and Royal Asters; for midseason display Giant Astermums, Giant Crego, California Giants and California Sunshine Asters. For late blooms you may select American Beauty, Giant Branching and Giant Mammoth Peony-Flowered Asters. Besides these types we urge planting the miscellaneous varieties offered on page 69; they include both midseason and late sorts. For a continuous display in the garden or an unlimited supply of cut flowers for the home or for roadside marketing early, midseason and late varieties should be selected. Sow indoors during March transplanting the seedlings after danger of frost is over, or outdoors when the nights have become balmy.

Also very valuable for bedding. The plants grow 15 to 18 in. tall and bloom during June. Start the seed indoors during February or March and transplant out of doors as soon as the ground is warm and settled warm weather is assured.

Improved Giant California Sunshine

Unusual beautiful blooms distinct from any other Asters

1089 Mixed Colors These Asters represent a decided departure from the conventional form of all other Asters offered by us. The blooms are very large and have long graceful outer ray petals. The center of the blooms is filled with smaller tubular petals which end in a small four-pointed star. This combination gives a lovely effect as shown in the illustration to the right. The plants grow 1 1/2 ft. tall and bloom during midseason. They are of attractive symmetrical growth, forming small cone-shaped bushes which are covered with flowers all around. Being long-stemmed the blooms give excellent cut flower material, particularly as they keep in perfect condition for a long time if placed in fresh water immediately after cutting. Includes light and deep rose, light and deep blue, purple, and other colors. Pkt. 15c; 1/8 oz. 60c; 1/4 oz. \$1.15.

Giant California Sunshine Aster

King Asters

The King Asters represent a midseason type with flowers which are distinct in every way. They have long, narrow petals which are rolled lengthwise, giving the petals a needle-like appearance and the entire flower a somewhat porcupine appearance. The plants make a sturdy growth about 2 ft. tall. They branch close to the ground which accounts for the long flower stems. We have selected the four best colors and are offering them here together with a mixture.

1068 Mixed Colors Though we consider the above four the best colors available, we have added others to the mixture for greater color variety. Pkt. 10c; 1/8 oz. 30c; 1/4 oz. 50c.

American Beauty

This is a magnificent true American type of Asters which excels in vigorous habit, size of bloom, free blooming character, and sturdy growth. The plants come into bloom in midseason and continue to flower freely until cut down by frost. The plants grow 2 to 2 1/2 ft. tall and make a graceful, round, well-branched bush. Due to the fact that the stems all start near the base of the plants, the flowers are extremely long-stemmed, which gives them particular value for cutting. The blooms are well formed and always fully double. They are composed of broad incurved petals gracefully arranged in an orderly but by no means stiff manner.

Maule's Beautiful Asters

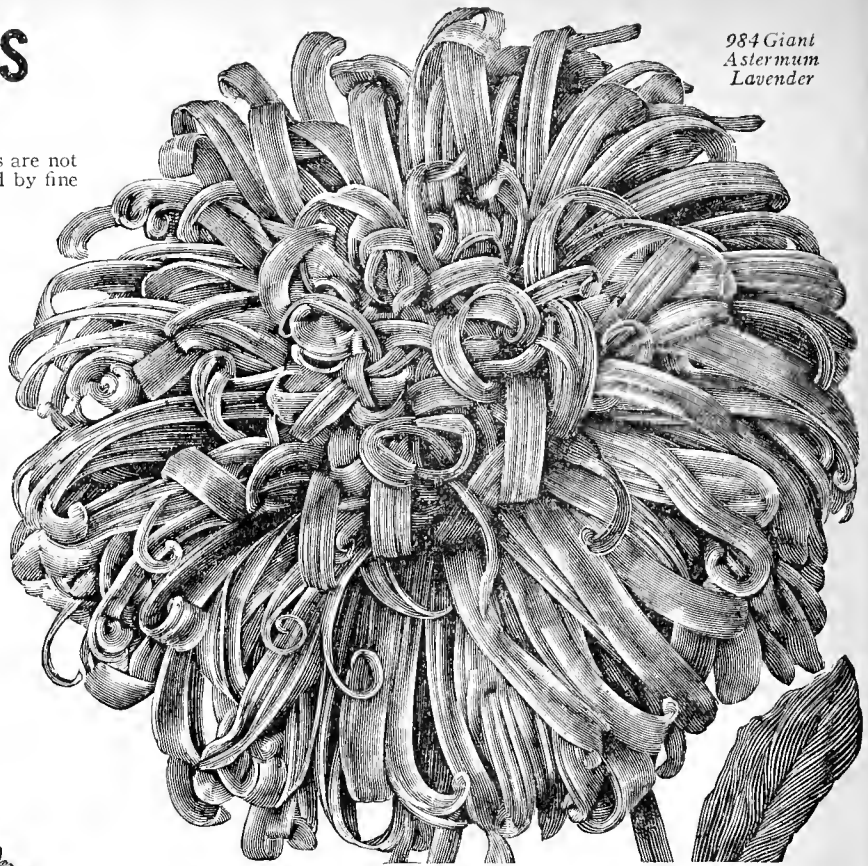

Giant Asternum

These Asters are extremely popular with many gardeners. The blooms are not only extremely large but they are heavy, well rounded, and supported by fine long and strong stems. The name Asternum refers to the similarity of the elegantly formed blooms to those of a choice Japanese Chrysanthemum. The individual petals of Asternums are long, narrow, and artistically curled and twisted, which gives the blooms particular charm and grace. Giant Asternum Asters bloom during midseason and form strong growing, well branched plants 2 to 2½ ft. tall. The branches start from the base, each ending in a large flower on a long stem which gives them their value for cutting. The individual blooms measure 4 in. across, are of splendid form, and hold their color nicely.

Branching Royal

Early Branching Royal

1100 Mixed Colors The Royal Asters come into bloom just after Maule's Earliest Blooming have passed their prime. The plants are of somewhat taller growth, reaching a height of 2 to 2½ ft. They carry their large, well rounded blooms on extra long stems which makes them desirable for larger beds, borders, and for cutting. The fine double flowers measure 3½ in. across and are composed of broad, medium-long flower petals which curve inward. Toward the center the smaller petals completely cover the center and often show a whorlike formation. This is a very free-blooming and large-flowered Aster which enjoys the greatest popularity with all kinds of gardeners. Pkt. 10c; ¼ oz. 30c; ¼ oz. 50c.

Giant Crego

Few other classes of Asters have become as popular as Giant Crego Asters. They are of American origin and represent a highly developed, large flowering Aster with blooms of the popular Chrysanthemum-like form. These blooms are very large, measuring 4 or 5 in. in diameter. They are carried on elegant long stems which make them ideal for cutting. The plants begin to bloom during midseason and continue to flower until way late into the fall. The bushes grow 2 ft. tall and are very much branched. We recommend Giant Crego Asters for borders, beds, and for cutting.

The new Wilt-Resistant strains of this charming type which we offer have become most popular ever since first introduced. All were thoroughly tried on wilt-infested land and withstood the acid test admirably.

Giant Pansies

1614 Maule's Prize Mixed Giant Pansies

Large sized flowers, 2 1/2 to 3 in. in diameter, of perfect form, heavy substance, and borne on long stems. It embraces an endless variety of the most beautiful colors in both soft and rich shades. You will find the finest self colors including white, yellow, pink, rose, blue, purple, and the rare, desirable red shades. Others have clearly defined mahogany-brown, purple or black eyes, and still others are attractively veined and bordered with contrasting colors. While some flowers are wide and flaring, others have attractively waved petals of graceful appearance. Pkt. 25c; 1/16 oz. 80c; 1/8 oz. \$1.50.

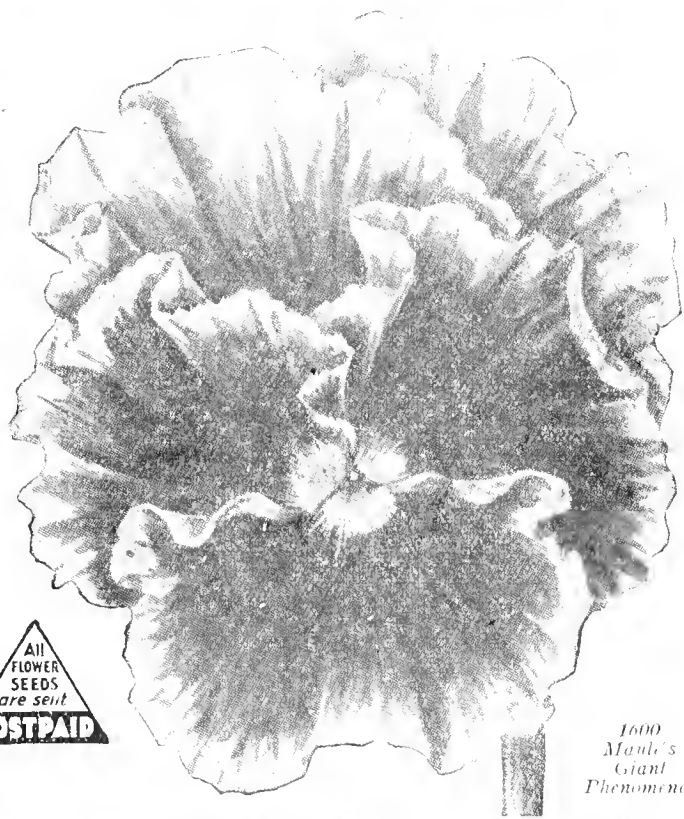

1594 Oregon Giants

As implied in the name, this strain is of American origin. It has truly giant flowers of a size heretofore unknown in Pansies. The fine, broad petals are somewhat more flattened than those of most other strains, which accounts for the large size of the blooms. Specimen flowers, 4 in. across, carried upright on strong stems are not unusual. A wide range of charming colors from nearly pure white to the richest purple. Pkt. 35c; 1/16 oz. \$1.00; 1/8 oz. \$1.75.

Pansies for Profit

Pansies can be commercially exploited with good profit. They are easy to grow, and easy to sell in cities or small towns. Why not plan to grow them for sale next spring? For sales during the planting season in the spring sow Pansy seed in late July and August, choosing a partially shaded place, and a deeply prepared, well pulverized soil. The seed bed must be kept moderately moist at all times. Covering it with paper or cloth until the seed germinates will help. Transplant the seedlings when they are large enough to handle in a well enriched soil, setting them 8 in. apart. Pansies are hardy and will live over winter without a frame. Mulch the plants with straw, hay, or leaves after the ground has frozen.

Remember that the Pansy plants with the largest flowers command the highest prices; so select a large-flowering variety. You cannot go wrong with Maule's Pansies—they are our greatest flower specialty.

Maule's Exquisite "Giant Ruffled" Petunias

1638
Ruffled Giants

1638 Ruffled Giants

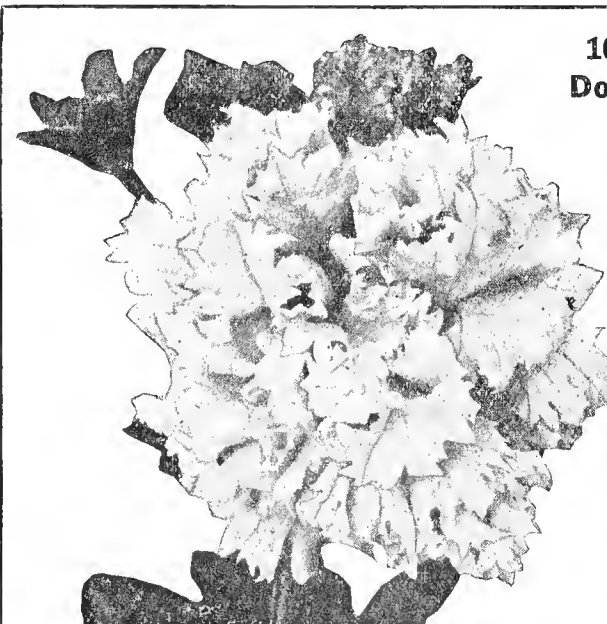

For size and beauty this Giant Ruffled type is unequalled. The flowers often measure 5 in. across. They are attractively ruffled or fringed and come in superb colors and shades, ranging from pure white through pink, salmon, rose, crimson, carmine, lavender, and blue to deep purple. All have deep, wide, light or dark throats attractively veined with contrasting colors. Pkt. 20c; 1/128 oz. 60c; 1/64 oz. \$1.00.

1618 Giant Scarlet Beauty

If you could have but one color of Petunias this year in your garden, you certainly would select this marvelous variety which is a beauty in every sense of the word—big, gorgeous, magnificently waved and most charmingly fringed at the edge of the corolla. A remarkable blend of scarlet and rose with deep crimson veins. One of the brightest of all Petunias. Pkt. 25c; 1/128 oz. 65c; 1/64 oz. \$1.20.

1619 Giant Theodosia

The blooms of this colorful Petunia are deep rose-red with a clearly defined yellow center and black veins leading into the large, open throat. The blooms are quite large, ruffled and of unusually heavy texture. Although of rather recent introduction, Theodosia has won the admiration of all who have seen it growing. Pkt. 30c; 1/128 oz. 70c; 1/64 oz. \$1.25.

1636 Extra Large Double Flowering Mixed

We make a specialty of this double flowering strain, constantly improving it by selection and hybridizing. Our seed is obtained by hand-pollination, and produces a high percentage of gorgeous plain-edged and fringed double flowers, the small balance being choice, large, single flowers of extra fine quality. We suggest to carefully save apparently weak-looking plants with crumpled foliage as these usually produce the best double flowers. Pkt. 35c; 1/128 oz. \$2.00.

Petunias belong to the most useful and cherished of all our annuals. Their wealth of bloom throughout the summer and fall, together with their wide range of gorgeous colors, their easy culture and their modest requirements, assure them a place in every garden.—The Giant Ruffled Petunias offered below are extremely large, heavily ruffled and many are attractively veined in the throat. They are desirable both for garden display and pot culture. Their seeds, being more costly than those of the Bedding and Balcony Petunias offered on the opposite page, are best started indoors in shallow boxes or pots during March-April and the seedlings transplanted where to bloom when the weather becomes settled.

1617 Giant Apple Blossom

A beautiful, large, fringed variety with lovely apple-blossom-pink blooms with delicate veins of a slightly deeper shade. In the throat the veins are soft green. Most beautiful. Pkt. 25c; 1/128 oz. 65c; 1/64 oz. \$1.20.

1625 Giant Copper-Red

Gorgeous, huge blooms most attractively ruffled and fringed. The color is a bright terra-cotta-red shading to bronze-pink in the throat, and blending into a beautiful coppery shade. Pkt. 25c; 1/128 oz. 65c; 1/64 oz. \$1.10.

1632 Giant Elk's Purple

Rich, deep, velvety purple flowers which are in wonderful contrast to the attractive green foliage. The individual flowers are of large size and heavy texture. The finest purple Petunia. Pkt. 25c; 1/128 oz. 65c; 1/64 oz. \$1.10.

1626 Giant Evening Star

An extra fine, giant Petunia. The large wide-open blooms are white shading to rich yellow towards the center and in the throat. Pkt. 25c; 1/128 oz. 65c; 1/64 oz. \$1.10.

Maule's Superb Bedding and Balcony Petunias

Superb Bedding Petunias

Bedding Petunias are indispensable in the garden. They are of easiest culture, are most profuse blooming and lend color to the garden from early summer until late in the fall. They are unusually hardy, withstanding even frost to some extent. When all other annuals have perished at the approach of wintry days these gay flowers hold their own, rivalling with the hardy Chrysanthemum for the supremacy in the garden. They are unsurpassed for beds, borders, edgings, etc.

The seed of Bedding Petunias may be sown outdoors in the spring as soon as the frost is out of the ground. Sow in shallow drills where to bloom or else in a special seed bed, covering the seeds slightly and firming with a smooth board or float. When large enough to handle thin or transplant to stand 8 to 12 in. apart.

Portulaca • Rock Rose, Sun Plant, Rose Moss

What could be prettier in a bed, border, porch box, or rock garden than this lovely plant with its delicate light green needle-like foliage and fine, large flowers in many gay colors? Give it full sun and a well drained, rather dry, or even stony soil and it will bloom all summer.

Sow as early in the spring as the ground can be worked into a mellow condition. Scatter the seed over the surface, slightly rake it in and firm with a smooth board. Later thin or transplant to stand 8 inches apart each way. For earlier blooms start plants indoors in shallow boxes or seed pans, transplanting later after all danger of frost is past. May be transplanted even when in bloom.

Maule's Colorful Snapdragons

Snapdragons, at all times, have been favorites in the garden, and up to this day have not lost any of their popularity. On the contrary—with the introduction of newer and better varieties and types in recent years, garden lovers have come to realize that Snapdragons have become a more essential factor in gardening than ever. But—not only for garden display are Snapdragons so welcome—they also are unsurpassed for cut flower bouquets either alone or in combination with other flowers. Finally, Snapdragons are excellent for growing in greenhouses during the winter. They readily respond to generous treatment and will reward the grower with a splendid crop of blooms from which to realize a good profit.

Semi-Tall Snapdragons

Excellent for bedding and cutting. The plants average 18 in. in height and form neat, bushy plants from which rise many large spikes closely set with fine blooms. While not quite so large-flowered as the Maximum varieties, this Semi-Tall type is preferred by some growers for forcing during the winter.

939 Brilliant Rose This is one of the most brilliant shades in Snapdragons and deserves to be grown extensively. Free blooming. A favorite with florists. Pkt. 10c; 1/8 oz. 35c; 1/4 oz. 60c.

Gorgeous Spikes of Giant Flowers on Plants 18 in. tall

Majestic Snapdragons are an entirely new race altogether. They are of quite recent introduction, but in spite of this fact have already won countless admirers in this country as well as abroad. And deservedly so, because they are beautiful and outstanding in many ways. The attractive plants, which are of unusually healthy growth, average about 18 in. in height, the same as the semi-tall type. They are, however, of more compact habit, have better foliage and, in general, are more attractive than others, even when not in bloom. The outstanding feature with them is the truly majestic, symmetrical flower-spikes which are composed of unusually broad, giant flowers placed densely on the erect stems.

957 Majestic, Mixed Colors A marvelous blend of specially selected, named varieties. Salvia • Flowering Sage

Few other flowers are so extensively used for bedding and garden display in general as Salvia, or, as it is commonly known, Scarlet Sage. Its long, showy spikes of bright, dazzling flowers, which are carried well above the rich green foliage are unusually cheerful, bringing color to the garden from early summer till late in the fall.—The blue varieties make excellent subjects in the

border and are ideal for cutting. Although they are hardy enough to live outdoors for a number of years where winters are mild, they are usually treated as annuals, save for variety *Azurea grandiflora*. All Salvias are of easy growth succeeding in a fairly rich, well-drained garden loam.

1722 Drooping Spikes The flower spikes are extra-long and heavily loaded with flowers so that they bend under their own weight. The color of the flowers is a brilliant scarlet-red. 2½ ft. tall. Pkt. 10c; 1/8 oz. 50c; 1/4 oz. 90c.

1723 Bonfire The sturdy plants grow 2 ft. tall, forming well-rounded bushes of even height. The long, stately spikes carry clear above the foliage large flowers of glowing scarlet-red. When in full bloom the dark foliage is completely hidden. Pkt. 10c; 1/8 oz. 40c; 1/4 oz. 70c.

1724 America or Globe of Fire An attractive variety, not over 15 in. tall, which makes it an excellent bedding plant. The shining scarlet flower spikes come into bloom very early in the season. Pkt. 10c; 1/8 oz. 50c; 1/4 oz. 90c.

1726 Scarlet Bedder This is the dwarfest of all Scarlet Sages reaching a height of but 1 ft. The plants form neatly rounded, compact bushes with showy, stocky flower spikes of rich scarlet blooms. The finest Sage for bedding and edging. Pkt. 10c; 1/8 oz. 50c; 1/4 oz. 90c.

1733 Mixed, All Colors A colorful mixture containing such exquisite shades as flesh-pink, salmon, carmine, purple, etc., together with some scarlet varieties. All are represented in proper proportions to make a most wonderful showing. Pkt. 10c; 1/8 oz. 50c; 1/4 oz. 90c.

SCARLET SAGE

Three Beautiful Blue Salvias

1727 Farinacea A remarkable Flowering Sage often referred to as "Mealy Sage". The well-branched plants grow 2½ to 3 ft. tall, bearing a profusion of thin, wiry flower stems studded with pale blue flowers. The stem as well as the calyx appears quite frosted and is of silvery blue appearance. Very desirable in the tall border or for specimen planting. Supplies lovely cut flower material throughout the season. Pkt. 10c; 1/8 oz. 40c; 1/4 oz. 75c.

1725 Farinacea, Blue Bedder Introduced but recently, this lovely variety has become quite popular by now. Its plants are of the same habit of growth as the type but not quite so tall. The flowers are rich, dark blue, contrasting wonderfully with the stem and calyx which are violet-white. Pkt. 15c; 1/8 oz. 40c; 1/4 oz. 70c.

1728 Azurea grandiflora Bright sky-blue flowers during August and September. They grow to perfection in an ordinary garden soil which is well-drained but damp to some degree. Although classed as a perennial, the plants will live outdoors over winter only in sections where the temperatures are not too severe. The roots may be lifted and stored late in the fall the same as Dahlia roots. Pkt. 10c; 1/8 oz. 40c; 1/4 oz. 70c.

What could be prettier and more impressive than a bed of these stately Zinnias with their glorious blooms. Words are inadequate to depict their beauty and charm. The illustration to the left gives an idea of their marvelous size. The flowers measure 5 in. or more in diameter. They are carried on long stems on massive plants, and are borne continuously from midsummer until frost. The plants are 3 1/2 ft. tall and fully as broad. The colors found in this type are gorgeous. They include many magnificent shades ranging from pure white, through yellow, old gold, lavender, pink, rose, salmon, and orange, to deep crimson.

2062 Golden Dawn

Of recent introduction with large, massive flowers of a beautiful golden yellow. The richness of its shade is bound to make it very popular once it is better known. One of the largest of the Dahlia-Flowered Zinnias and a fine color. **Pkt. 15c; 1/8 oz. 40c; 1/4 oz. 70c.**

2067 Luminosa

An entirely new shade of Zinnias—bright pink suffused with salmon. The well proportioned flowers are borne on long stems well above the foliage. A free blooming variety of good qualities. **Pkt. 15c; 1/8 oz. 40c; 1/4 oz. 70c.**

2072 Meteor

This is claimed to be the darkest of all reds; at all events, it is a glowing deep red, very showy and adapted for cut flowers as well as for garden ornamentation. **Pkt. 15c; 1/8 oz. 40c; 1/4 oz. 70c.**

2068 Old Gold

The wonderful rich shades of light and deep old gold make it one of the foremost varieties in this color class. Goes well with other varieties for a colorful effect. Bold flowers held upright on long and strong stems. **Pkt. 15c; 1/8 oz. 40c; 1/4 oz. 70c.**

2060 Old Rose

As implied in the name, the color is a lovely old rose shade, appropriate for all decorative purposes. This is a color not often seen in flowers and it will surely please. It is a sturdy flower of extreme size and of heavy substance. **Pkt. 15c; 1/8 oz. 40c; 1/4 oz. 70c.**

2061 Oriole

Attractive flowers of immense proportions and a color that appeals to the eye—a bright, glistening orange, shaded with liquid gold towards the outer edge, changing to a mellow old gold tone.
